

JIG-GEL

1 set (6ea) ≙ 100g

What is JIG-GEL?

JIG-GEL is a gel type substance containing resin material to make implant jig and implant verification bar. JIG GEL is a injection method, instead of mixing resin powder and liquid.

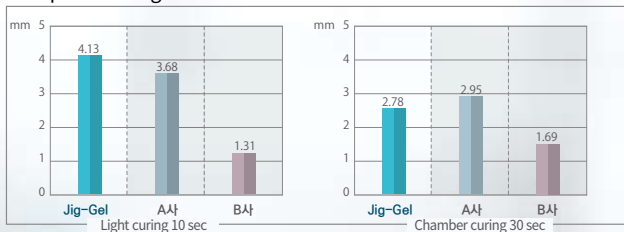

Advantages of JIG-GEL

- Easy to build up & Simple to use
- Reduce working time
- It does not need separation and polishing
- It does not have resin odor
- Affordable price
- Guaranteed quality (Optimum Flow and Little shrinkage)

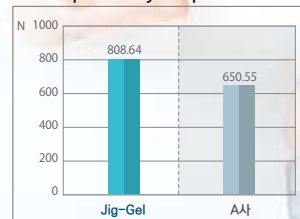

Optimum Flow

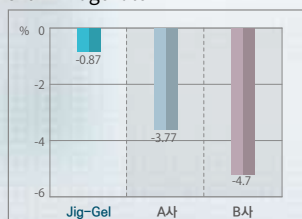

1. Depth of Curing

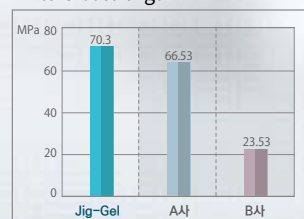

2. Compressive yield point

3. shrinkage rate

4. Flexural strength

5. Elongation
